

# Cortado Corporate Server

100 % On-Premises – Installed & Run Entirely On Your Corporate Network

Feature		iOS	Samsung SAFE	An-droid	Black-Berry	HTML5 (PC/Mac)
<b>Mobile Device Management</b>						
Device Management	Enable secure BYOD and mobile business instantly by managing the device pool and connecting devices to file, database and print systems.	✓	✓	✓	✓	✓
Policy Management	Configure, administer and enforce corporate policies flexibly per user, user group or platform.	✓	✓	✓	✓	✓
Fast Enrollment	Quickly & easily integrate mobile devices into the IT environment via QR codes: By scanning the code, all certificates, the MDM profile and the Cortado Client are installed on the mobile device. These devices can then be distributed, fully preconfigured, to users.	✓	✓	✓		
E-mail Push	Push all e-mail settings to the user's device through Cortado's Management Console. All settings are configured OTA to individual users, groups or the entire enterprise.	✓	✓			
Wi-Fi Configuration Push	Wi-Fi settings are configured OTA and directly pushed to the device. No input by the user himself is required. Employees can immediately use the Wi-Fi network.	✓	✓			
VPN Configuration Push	VPN configurations can be instantly pushed to individual users, groups or the entire enterprise.	✓	✓			
Active Directory Integration	All existing rights on the corporate network are transferred to Cortado Corporate Server in real-time. Administrators have the option to further limit these for individual users or groups.	✓	✓	✓	✓	✓
Administration by Active Directory Groups	Cortado uses Windows Active Directory as a basis to let you effortlessly manage user groups.	✓	✓	✓	✓	✓
PowerShell Scripting Interface	Simplify the management and automation of MDM processes especially for larger user groups with the integrated Windows PowerShell configuration.	✓	✓	✓	✓	✓

Feature		iOS	Samsung SAFE	An-droid	Black-Berry	HTML5 (PC/Mac)
Granular User Management	Add users with specific user rights and decide which content they are allowed to access (Mobile Content Management/MCM).	✓	✓	✓	✓	✓
Mobile Data Management	Supplying corporate drives and data to mobile employees. The user gets the functionality to access, edit or create and share documents. This increases the productivity and optimizes the capacity to act outside the office (MCM).	✓	✓	✓	✓	✓
BYOD	The highest levels of security and control enable a comprehensive BYOD strategy.	✓	✓	✓	✓	✓
24/7 Administration Possibility	Support mobile employees via the easy-to-use HTML5-based Management Console from any device and at any time. Administer users, devices and rights centralized in one Management Console quickly and simply.	✓	✓	✓	✓	✓
Samsung SAFE Support	Support of SAFE (Samsung for Enterprise) MDM features like application management, Wi-Fi profiles, VPN configuration, Kiosk Mode and more.		✓	(✓)		
iOS 7 Support	Cortado creates a secure iOS business container by supporting and extending the iOS 7 business features.	✓				
IPCU Support	The iOS Configuration Utility is supported by Cortado Corporate Server and lets provisioning profiles and applications already configured to be easily adopted.	✓				
iOS Print Management	Integrating and managing the native iOS print function is very simple. Thanks to Active Directory integration, the allocation of printers to the respective users is made in accordance with the Active Directory rights using specific iOS printing profiles.	✓				
Extensive Monitoring and Reporting	Monitor user behavior to safeguard compliance requirements. All important statistics and reports are presented at a glance. All user actions are recorded in an event log.	✓	✓	✓		
Automated Compliance Enforcement	After possible irregularities like a jailbreak or the installation of a blacklisted app, the client is automatically locked or the data partially wiped.	✓	✓	✓	✓	
User Self Service Portal/Self-Enrollment	Through the User Self Service Portal, users are provided with convenient management options and all relevant corporate resources. In case of loss or theft, the user is also able to locate, lock or wipe the device.	✓	✓	✓	✓	✓

Feature		iOS	Samsung SAFE	An-droid	Black-Berry	HTML5 (PC/Mac)
Adaptive MDM	The available MDM features flexibly adapt to the individual requirements of each device, as well as the existing IT environment. Cortado's MDM is based on Microsoft ActiveSync, Apple Push, Samsung SAFE and Cortado's own MDM services and provides the best available management functions according to requirements of each device.	✓	✓	✓	✓	
Scalability	Cortado Corporate Server is a cross-platform solution that easily grows with the architecture. New devices and users or user groups can be added quickly and effortlessly. The solution was tested with more than 300,000 accounts and therefore is suitable for even the largest environments.	✓	✓	✓	✓	✓

## Mobile Application Management

Application Management	Intranet and internet applications, as well as self-developed and third-party apps are centrally managed and can be provisioned to users over the air (OTA).	✓	✓	✓	✓	
Distribution of Self-Developed Apps	Enable secure and fast deployment of self-developed apps through Cortado Corporate Server.	✓		✓		
Enterprise Resource Store	In the Enterprise Resource Store apps, web and corporate apps can be recommended and made available securely to users.	✓		✓		
Apple VPP Support	Cortado fully supports Apple's VPP. Apps can be acquired, managed and made available to employees – also in large amounts and without requiring any user interaction.	✓				
Managed Open In	Control app access to files and decide which apps can access and share corporate data.	✓				
Per App VPN	VPN can be used exclusively for corporate apps, private traffic generated by apps such as YouTube or Skype can be excluded.	(✓)				
Application Push/Managed Apps	Push apps to devices as managed apps and decide with which corporate data they can interact with - without requiring user interaction.	✓	✓	(✓)		
Native iOS Container	Create a native container on iOS 7 with Cortado Corporate Server, even including the native mail app. Cortado improves this container by adding secure file access and sharing, as well as a secure web browser.	✓				

Feature		iOS	Samsung SAFE	An-droid	Black-Berry	HTML5 (PC/Mac)
<b>Mobile Security</b>						
Private Cloud Solution	Cortado Corporate Server is available as private cloud solution and can be installed behind the firewall on a secure corporate network.	✓	✓	✓	✓	✓
Comprehensive Password Policy	A huge number of password guidelines for example Maximum Password Age or Force Alphanumeric Password and much more can be provided by the administration.	✓	✓	✓	✓	✓
Online and/or Offline Password	Unique technology requires a server-side password, if required even when offline. The password is however never saved on the device. This means a maximum of security for corporate data.	✓	✓	✓		
Single Sign-On	Users only enter the password once to access the Cortado Corporate Server secure container, with all apps that have been permitted for use, including enterprise apps.	(✓)				
Single Point of Access	Cortado Corporate Server receives data via one single port to ensure the highest security levels.	✓	✓	✓	✓	✓
Minimized Local Data Storage	The anytime, anywhere access to the corporate network makes local storage of files unnecessary. Many functions are carried out server-side. For example no download is necessary to view a file, instead a data-optimized preview is displayed.	✓	✓	✓	✓	✓
Optimized Document Preview	All data remains on the sever using the preview function, even when copying or moving files.	✓	✓	✓		
Remote Wipe	Safeguard corporate data from unauthorized access with the unique functionality of a full remote wipe.	✓	✓	✓	✓	
Partial Wipe	Cortado Corporate Server is the only solution which enables even locally stored data to be selectively deleted. E-mail, VPN or Wi-Fi profiles and apps can be wiped as well.	✓		✓	✓	
Policy Support	The solution supports all iOS policies including iOS6, as well as Android, RIM through BES and Windows Mobile/Phone through ActiveSync. It also offers additional policy settings.	✓	✓	✓	✓	✓
Lock device	Lost or stolen devices can be remotely locked and a password is required to unlock it.	✓	✓	✓		

Feature		iOS	Samsung SAFE	An-droid	Black-Berry	HTML5 (PC/Mac)
Samsung KNOX Support	By supporting Samsung KNOX and the KNOX Container a secure way of confidential data transfer between mobile device and corporate network can be ensured. The Cortado app is available in the KNOX marketplace.		✓	(✓)		
Flexible and Secure Certificate Management	To match your company environment, it is possible to either use Cortado Corporate Server with self-signed certificates, your company owned certificates or purchased certificates.	✓	✓	✓	✓	✓
2-Factor Authentication by Certificates and Password	Additional levels of security tailored to meet specific requirements.	✓	✓	✓		✓
ActiveSync Proxy	Manage e-mail access for users entering the Cortado server instead of the Exchange server to define basic policies.	✓	✓	✓	✓	
Encrypted Document Store	Your corporate data is saved securely as it is stored encrypted. Also during a data transmission the documents are encrypted. Even pictures taken with camera can be saved as encrypted PDF.	✓	✓	✓	✓	
Forced PDF Download	Enable documents to be downloaded as PDF files only, forcing data to be converted into a PDF before being downloaded by users. Documents can be protected from being modified during mobile work.	✓	✓	✓		✓
Device localization by GPS Data	In case of loss, a user or administrator can locate the device via the HTML5 console from any web-enabled device.	✓	✓	✓		
Secure Intranet Browser	Secure Net allows accessing websites and web applications on the intranet securely while mobile.	✓	✓	✓		
Wi-Fi Profile Management	Wi-Fi profiles can be easily created and assigned to users or user groups.	✓	✓	✓		

Feature		iOS	Samsung SAFE	An-droid	Black-Berry	HTML5 (PC/Mac)
<b>Professional File Sharing &amp; Teamwork</b>						
Access to Corporate Network Shares with Any Device	Mobile users access their corporate IT via the native app for BlackBerry, Android and iOS as well as via an HTML5 version for PCs, Macs, and other web-enabled devices. Employees can also save their mobile work back to the network drives.	✓	✓	✓	✓	✓
Smart Filing	Patent-pending technology enables employees to automatically save files back to their point of origin, without having to endlessly scroll through directory trees, and without versioning conflicts or a potential loss of data.	✓	✓	✓		✓
Versioning	Cortado Corporate Server manages all versions of a document that have been created. Users easily access a clear overview of all versions.	✓	✓	✓		✓
Check-in/check-out	Cortado's Smart Filing is a far simpler and superior alternative to the complex check-in/check-out alternatives. Files are not blocked, but can be used simultaneously. An intelligent storage algorithm bypasses versioning conflicts or the accidental overwriting of files.	✓	✓	✓		✓
Corporate File Sharing	Teamwork made easy: Stop moving files in and out of synchronization folders and access up-to-date team folders at any time. A secure, personalized and unlimited way of sharing data with colleagues is possible.	✓	✓	✓	✓	✓
Smart File Sharing Options	The Smart Sharing technology enables simple, secure, data-friendly file sharing – even with those outside the company. If an external recipient is addressed, a copy of the file is automatically created in the cloud. The corporate network remains inaccessible from outside the company.	✓	✓	✓		(✓)
Sending Documents as Mail Attachments	You can also send documents as e-mail attachments using the Cortado Client.	✓	✓	✓	✓	✓
Intelligent Sync	Cortado Sync lets you precisely determine which data should be automatically saved back to the company server. This feature enables sensible and efficient workflows by preventing data and synchronization chaos.					✓

Feature		iOS	Samsung SAFE	An-droid	Black-Berry	HTML5 (PC/Mac)
Open Documents in Applications	Open documents securely in other applications and work like on a desktop PC.	✓	✓	✓		✓
Secure File Preview	The file preview function makes it unnecessary to download content. Every operation runs serverside, with this feature users can also check whether they have chosen the right document.	✓	✓	✓	✓	✓
Auto Upload	Cortado Sync enables intelligent unidirectional synchronization. With Auto Upload, the user specifies local folders whose contents are automatically uploaded to his user directory on the server and are available from any device.		✓	✓		✓
Auto Download	Auto Download is an element of Cortado Sync offering a unidirectional, smart way of synchronization. The user defines a folder on the server whose contents are automatically updated to his other devices, like his PC or Mac.	(✓)		✓		✓
Access to SharePoint	With Cortado Corporate Server, employees access Microsoft SharePoint with their tablet, smartphone or notebook, just as easily as any other file system. Neither a separate app nor an extra browser is required.	✓	✓	✓		✓
Remote Windows Apps	Windows apps like Word or Excel can be accessed via the mobile device and used to view or edit documents. No additional app is needed.	✓	✓	✓		
Faster Workflows	Up to 90% less data volume in comparison with other solutions results in a fast and cost-saving mobile productivity.	✓	✓	✓	✓	✓
Superb User Experience	The native Cortado app is designed in the look and feel of the users device and can fully interact with the device's local resources. This ensures optimal user-friendliness and high user acceptance.	✓	✓	✓	✓	✓
Network Printing	Cortado allows users to print on any network printer via their smartphone, tablet or any other mobile device - even when not in the same network.	✓	✓	✓	✓	✓
Mobile Wi-Fi Printing	The Cortado app offers your company the leading cloud printing technology. Employees print directly from their mobile device to any network or Wi-Fi printer.	✓	✓	✓	✓	

Feature		iOS	Samsung SAFE	An-droid	Black-Berry	HTML5 (PC/Mac)
Bluetooth Printing	The Cortado app offers your company the leading cloud printing technology. Employees print directly from their mobile device to Bluetooth printers.		✓	✓	✓	
Native iOS Printing	Cortado offers full printing support for iOS. No matter what app, which printer or even which location and regardless of the scenario. Users can also print from applications that don't support native iOS printing. And even outside the corporate network, printing to a network printer in the company is still possible.	✓				
Personal Printing / Pull Printing	Cortado offers confidential printing if needed. Highly sensitive documents are secured as the printout only takes place once the user identifies himself at the printer.	✓	✓	✓	✓	✓
PDF Rendition	Convert data into PDFs and view them with standard programs.	✓	✓	✓	✓	✓
Zip/Unzip	Effortlessly convert files to ZIP format and unzip them if required.	✓	✓	✓	✓	✓
Complete File Management	Arrange the documents you are working with by creating folders, copying, moving or deleting them.	✓	✓	✓	✓	✓
Web based File Access	Beside native and optimized apps for iOS, Android and BlackBerry, the HTML5 version of the Cortado app offers user access with nearly any device. All they need is an HTML5-enabled web browser on their device.	✓	✓	✓	✓	✓
Sending Documents as Fax	Cortado enables documents to be sent per fax via mobile devices while on the go.	✓	✓	✓	✓	✓
Database Reports	By choosing various parameters, individual queries are possible. An automatically generated PDF report can be viewed, printed, faxed or e-mailed as an attachment.	✓	✓	✓		✓
Save Websites as PDF	With Secure Net convert and save web pages to PDF and view them offline or send them to customers, contractors etc.	✓
